STRIKEWELL ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the Three Months Ended March 31, 2009 and 2008

1. NATURE OF OPERATIONS AND GOING CONCERN

The Company was incorporated under the laws of British Columbia and its principal business activities are oil and gas production and exploration. On January 1, 2006, the Company purchased all of the issued and outstanding shares of Strikewell Capital Corp. ("Strikewell Capital"), a company that owns producing petroleum and natural gas interests near Garrington, Alberta.

These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will be able to continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the normal course of business.

The Company has incurred significant operating losses over the past several fiscal years, is currently unable to self-finance operations, has a working capital deficit of \$587,563 at March 31, 2009 (2008 - \$553,429), an accumulated deficit of \$23,934,370 (2008 - \$23,319,115), limited resources and no assurances that sufficient funding will be available to conduct further exploration and development of its mineral interests. The Company will require additional equity financing to meet its administrative overhead costs, and to continue exploration work on its mineral properties in 2009.

The application of the going concern concept is dependent upon the Company's ability to generate future profitable operations and receive continued financial support from its shareholders. Management is actively seeking to raise the necessary capital to meet its funding requirements and has undertaken available cost cutting measures. There can be no assurance that management's plan will be successful given the current difficult conditions.

These interim consolidated financial statements do not include any adjustments relating to the recoverability of assets and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

Since inception, the Company has financed its operations primarily through the sale of common shares and the issuance of notes and loan payable. For the foreseeable future it will need to rely upon financing from shareholders and/or debt holders for sufficient working capital and to finance further acquisitions and exploration on petroleum and natural gas interests yet to be acquired. Long-term profitability of the Company will be directly related to the success of its petroleum and natural gas interests.

2. SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements of the Company have been prepared in accordance with Canadian generally accepted accounting principles ("GAAP"). The Company's functional and reporting currency is the Canadian dollar.

(a) Basis of consolidation

These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, Strikewell Capital Corp. All significant intercompany balances and transactions have been eliminated on consolidation.

STRIKEWELL ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the Three Months Ended March 31, 2009 and 2008

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(b) Financial instruments

All financial instruments are classified as one of the following: held-for-trading, held-to-maturity, loans and receivables, available-for-sale or other financial liabilities. Financial assets and liabilities held-for-trading are measured at fair value with gains and losses recognized in net income. Financial assets held-to-maturity, loans and receivables, and other financial liabilities are measured at amortized cost using the effective interest method. Available-for-sale instruments are measured at fair value with unrealized gains and losses recognized in other comprehensive income (loss) and reported in shareholders' equity. Any financial instrument may be designated as held-for-trading upon initial recognition.

Transaction costs that are directly attributable to the acquisition or issue of financial instruments that are classified as other than held-for-trading, which are expensed as incurred, are included in the initial carrying value of such instruments.

(c) Comprehensive income

Comprehensive income or loss is defined as the change in the net assets of the Company for a period, other than changes attributable to transactions with shareholders. It is made up of net income and other comprehensive income. Other comprehensive income or loss refers to items recognized in comprehensive income or loss that are excluded from operations calculated in accordance with Canadian GAAP.

The Company has no items of other comprehensive income in any period presented. Therefore, net loss as presented in the Company's statements of operations equals comprehensive loss.

(d) Use of estimates

The preparation of financial statements in conformity with Canadian GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Significant areas requiring the use of estimates include the collectability of accounts receivable, the recoverability of petroleum and natural gas interest costs, the fair value of financial instruments, balance of accrued liabilities, the assumptions used to discount the notes payable to fair value, determination of asset retirement and environmental obligations, the rates of depletion and accretion of petroleum and natural gas interests, and the valuation allowance for future income tax assets. While management believes these estimates are reasonable, actual results could differ from those estimates and could impact future results of operations and cash flows.

STRIKEWELL ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the Three Months Ended March 31, 2009 and 2008

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(e) Revenue recognition

Revenue from the sale of petroleum and natural gas is recorded when title passes to an external party and is based on volumes delivered to customers at contractual delivery points and rates and collectability are reasonably assured. The costs associated with the delivery, including operating and maintenance costs, transportation and production-based royalty expenses, are recognized during the same period in which the related revenue is earned and recorded.

(f) Petroleum and natural gas interests

The Company follows the full cost method of accounting for petroleum and natural gas interests whereby all costs of exploration for and development of petroleum and natural gas reserves are capitalized. These costs include lease acquisition costs, geological and geophysical expenses, drilling costs of successful, as well as unsuccessful wells, and overhead charges related directly to exploration. The carrying value of petroleum and natural gas interests are not intended to report replacement or current market values.

If the interests are sold or abandoned, the proceeds will be applied against capitalized costs unless such sale significantly impacts the rate of depletion.

Costs associated with unproven reserves are reviewed by management to determine whether they have become impaired. If impairment occurs, the carrying value of the related interest will be reduced to reflect the estimated net realizable value. The estimate will be based on the then current conditions and it is possible that changes could occur that would adversely affect management's estimates resulting in further write-downs of the carrying value of the interest.

Depletion and accretion of petroleum and natural gas interests is computed using the unit-of-production method where the ratio of actual production to estimated future production determines the proportion of depletable costs to be expensed. Petroleum and natural gas are converted to a common unit of measure using units of revenue based on current prices.

(g) Ceiling test

The net carrying value of the Company's petroleum and natural gas properties is limited to an ultimate recoverable amount. The Company tests impairment against undiscounted future net revenue from proved reserves using expected future prices and costs as well as the income tax legislation in effect at the year-end. Impairment is recognized when the carrying value of the assets is greater than the undiscounted future net revenues, in which case the assets are written down to the fair value of proved plus probable reserves plus the cost of unproved properties, net of impairment allowances. Fair value is determined based on discounted future net cash flows calculated using expected future prices and costs as well as the income tax legislation in effect at the year-end. The discounted rate used is a credit adjusted risk-free interest rate.

STRIKEWELL ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the Three Months Ended March 31, 2009 and 2008

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(h) Joint interest operations

The Company's petroleum and natural gas exploration and production activities are conducted jointly with others and, accordingly, the financial statements reflect only the Company's proportionate interest in such activities. The Company collects production from joint interest participants for delivery to marketers and remits the proportionate interest to joint interest participants.

(i) Income taxes

The Company uses the asset and liability method for accounting for income taxes. Under this method of tax allocation, future income tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis, and losses carried forward. Future income tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on future income tax assets and liabilities of a change in tax rates is included in operations in the period in which the change is enacted or substantially assured. The amount of future income tax assets recognized is limited to the amount of the benefit that is more likely than not to be realized.

(j) Earnings per share

Basic earnings per share is computed using the weighted average number of common shares outstanding during the year. The Company uses the treasury stock method to compute the dilutive effect of options, warrants and similar instruments. Under this method the dilutive effect on earnings per share is calculated presuming the exercise of outstanding options, warrants and similar instruments. The treasury stock method assumes that proceeds received from the exercise of stock options and warrants would be used to repurchase common shares at the average market price during the period. However, the calculation of diluted loss per share excludes the effects of various conversions and exercise of options and warrants that would be anti-dilutive.

Shares held in escrow other than where their release is subject to the passage of time, are excluded from the computation of loss per share until the conditions for their release are satisfied.

(k) Stock-based compensation

The Company accounts for stock-based compensation using a fair value based method with respect to all stock-based payments measured and recognized, to directors, employees and non-employees. For directors and employees, the fair value of the options is measured at the date of grant. For non-employees, the fair value of the options is measured on the earlier of the date at which the counterparty performance is completed or the date the performance commitment is reached or the date at which the equity instruments are granted if they are fully vested and non-forfeitable. The fair value of the options is accrued and charged either to operations or petroleum and natural gas interests, with the offset credit to contributed surplus.

STRIKEWELL ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the Three Months Ended March 31, 2009 and 2008

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(k) Stock-based compensation (Continued)

For directors and employees the options are recognized over the vesting period, and for non-employees the options are recognized over the related service period. If and when the stock options are ultimately exercised, the applicable amounts of contributed surplus are transferred to capital stock.

(l) Asset retirement obligations ("ARO")

The Company's operations are subject to various laws and regulations for federal and regional jurisdictions governing the protection of the environment. These laws are continually changing. The Company believes its operations are in compliance with all applicable laws and regulations. The Company expects to make, in the future, expenditures that comply with such laws and regulations but cannot predict the full amount or timing of such future expenditures. Estimated future reclamation costs are based principally on legal and regulatory requirements. Reclamation and remediation obligations arise from the acquisition, development, construction, and normal operation of oil and gas properties, plant and equipment.

The Company recognizes an estimate of the liability associated with an ARO in the financial statements at the time the liability is incurred. The estimated fair value of the ARO is recorded as a long-term liability, with a corresponding increase in the carrying amount of the related asset. The capitalized amount is depleted on a straight-line basis over the estimated life of the asset. The liability amount is increased each reporting period due to the passage of time and the amount of accretion is charged to earnings in the period. The ARO can also increase or decrease due to changes in the estimates of timing of cash flows or changes in the original estimated undiscounted cost. Actual costs incurred upon settlement of the ARO are charged against the ARO to the extent of the liability recorded.

(m) Financial Instruments – Disclosures (Section 3862) and Financial Instruments – Presentation (Section 3863)

Sections 3862 and 3863 replace Handbook Section 3861, "Financial Instruments – Disclosures and Presentation", revising its disclosure requirements, and carrying forward its presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks.

Section 3862 specifies disclosures that enable users to evaluate: (i) the significance of financial instruments for the entity's financial position and performance; and (ii) the nature and extent of risks arising from financial instruments to which the entity is exposed and how the entity manages those risks.

As a result of the adoption of these standards, additional disclosures on the risks of certain financial instruments have been included in note 3.

STRIKEWELL ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the Three Months Ended March 31, 2009 and 2008

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

(n) Capital Disclosures (Section 1535)

Section 1535 establishes standards for disclosing information about an entity's capital and how it is managed. The entity's disclosure should include information about its objectives, policies and procedures for managing capital and disclose whether it has complied with any capital requirements to which it is subject and the consequences of non-compliance.

As a result of the adoption of this standard, additional disclosures have been included in note 4.

(o) Future accounting changes

(i) International Financial Reporting Standards ("IFRS")

In 2006, the Canadian Accounting Standards Board ("AcSB") published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five year transitional period. In February 2008, the AcSB announced that January 1, 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada's own generally accepted accounting principles. The IFRS standards will be effective for the Company for interim and fiscal period reporting commencing January 1, 2011. The effective date will require the restatement for comparative purposes of amounts reported by the Company for the interim periods and for the year ended December 31, 2010. While the Company has begun assessing the adoption of IFRS for 2011, the financial reporting impact of the transition to IFRS cannot be reasonably estimated at this time.

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial instruments include cash, accounts receivable, accounts payable and accrued liabilities, loan payable, and notes payable. Cash is designated as held-for-trading; accounts receivable are designated as loans and receivables; and accounts payable and accrued liabilities, due to joint interest participants, loan payable and notes payable are designated as other financial liabilities.

(a) Fair value

The carrying values of cash, accounts receivable, accounts payable and accrued liabilities and due to joint interest participants approximate their fair value due to the short-term maturity of these financial instruments.

The fair values of loan payable and notes payable have not been disclosed as their fair values cannot be reliably measured since the parties are not at arm's length and there is no active, liquid market for similar instruments.

STRIKEWELL ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the Three Months Ended March 31, 2009 and 2008

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (Continued)

(b) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, commodity price risk and other price risk.

(i) Interest rate risk

The Company's cash is held in bank accounts and due to the short-term nature of these financial instruments, fluctuations in market rates do not have an impact on the fair value as at March 31, 2009.

The Company's loan and notes payable are at fixed interest rates and, therefore, the Company's exposure to interest rate cash flow risk on the debt is minimal.

The Company manages interest rate risk by maintaining an investment policy that focuses on preservation of capital and liquidity.

The Company is not exposed to fluctuations in interest rate changes since the Company's debt is payable at fixed rates.

(ii) Commodity price risk

The Company is exposed to fluctuations in commodity prices that are based in a foreign currency (US dollars).

A 10% change in the price of petroleum and natural gas during the three month period ending March 31, 2009 would have changed net loss by \$21,404.

(iii) Other price risk

Other price risk is the risk that the fair or future cash flows of a financial instrument will fluctuate because of changes in market prices, other than those arising from interest rate risk or commodity price risk. The Company is not exposed to significant other price risk.

(c) Credit risk

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its payment obligations. The Company is exposed to credit risk with respect to its cash and accounts receivable. The credit risk associated with cash is minimized substantially by ensuring these financial assets are placed with a major financial institution with strong investment grade ratings by a primary ratings agency. Accounts receivable primarily consists of GST refunds due from Canada Revenue Agency and revenues due from continuing customers for the sale of petroleum and natural gas.

STRIKEWELL ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the Three Months Ended March 31, 2009 and 2008

3. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (Continued)

(c) Credit risk (continued)

Concentration of credit risk exists with the Company's accounts receivable. The Company's concentration of credit risk and maximum exposure thereto is as follows:

GST receivable	\$ 43,086
Trade receivable	192,437
<hr/>	
Total accounts receivable	\$ 235,523

The Company believes that there is minimal exposure to credit risk in regard to the amounts receivable as they are due from a governmental agency and the trade receivables are due from major oil and gas marketers.

(d) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in obtaining funds to meet commitments. The Company's approach to managing liquidity risk is to provide reasonable assurance that it will have sufficient funds to meet liabilities when due. The Company manages its liquidity risk by forecasting cash flows from operations and anticipated financing activities. The Company has a cash balance at March 31, 2009 in the amount of \$116,234 (2008 - \$70,776) and accounts receivable of \$235,523 (2008 - \$248,596). At March 31, 2009, the Company had accounts payable and accrued liabilities of \$552,421 (2008 - \$498,045) and a working capital deficiency of \$587,563 (2008 - \$553,429). Based on the current funds held, the Company will need to rely upon financing from shareholders and/or debt holders to obtain sufficient working capital. There is no assurance that such financing will be available on terms and conditions acceptable to the Company.

4. CAPITAL MANAGEMENT

The Company defines its capital structure to include debt and shareholders' equity. Capital requirements are driven by the Company's exploration activities on its petroleum and oil and natural gas interests. Management's objective is to ensure that there are adequate capital resources to safeguard the Company's ability to continue as a going concern. Management reviews its capital management approach on an ongoing basis and believes that its approach given the relative size of the Company is reasonable.

Although the Company has been successful at raising funds in the past through obtaining debt financing from current shareholders, it is uncertain whether it can continue this financing due to the current difficult economic conditions.

The board of directors does not establish a quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company's capital stock and debt is not subject to any externally imposed capital requirements and the Company did not change its approach to capital management during the year.

STRIKEWELL ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the Three Months Ended March 31, 2009 and 2008

5. DEPOSITS

Deposits consist of cash advances paid to operators that are to be applied towards future expenditures for petroleum and natural gas interests.

6. MINERAL PROPERTY

	2009	2008
La Forma Property	\$ 1	\$ 1

The Company owns a 100% interest in the La Forma Property located in the vicinity of Mount Freegold, Yukon Territory. Due to a lack of current and foreseeable activity at La Forma gold property as a result of the Company's focus on the oil and gas sector, the investment in the La Forma Property has been reduced to a nominal value of \$1. The Company maintains the claims in good standing.

7. PETROLEUM AND NATURAL GAS INTERESTS

March 31, 2009			
	Cost	Accumulated Depletion	Net Book Value
Garrington Property	\$ 4,717,453	\$ 3,879,640	\$ 837,813
December 31, 2008			
	Cost	Accumulated Depletion	Net Book Value
Garrington Property	\$ 4,459,856	\$ 3,570,235	\$ 889,621

8. LOAN PAYABLE

	March 31, 2009	December 31, 2008
Unsecured loan payable, with interest at 10% per annum, compounded semi-annually, due June 1, 2010	\$ 1,063,499	\$ 1,041,851
Less: Current portion	0	0
	\$ 1,063,499	\$ 1,041,851

Included in the loan payable is accrued interest of \$197,575 (2008 - \$175,927).

In 2008, the lender amended terms of the original loan agreement dated October 1, 2006 to extend the maturity date of the loan from June 1, 2008 to June 1, 2010. All pre-existing terms of the loan are still existent for the amended loan.

STRIKEWELL ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the Three Months Ended March 31, 2009 and 2008

9. NOTES PAYABLE

	Vendor Note	Second Note	Total
Face value of notes payable	\$ 2,715,295	\$ 3,816,854	\$ 6,532,149
Discount to effective rate	(818,908)	(1,151,128)	(1,970,036)
Carrying amount, January 1, 2006	1,896,387	2,665,726	4,562,113
Accretion of discount	178,458	250,856	429,314
Carrying amount, December 31, 2006	2,074,845	2,916,582	4,991,427
Accretion of discount	200,516	281,863	482,379
Carrying amount, December 31, 2007	2,275,361	3,198,445	5,473,806
Accretion of discount	197,332	277,388	474,720
Carrying amount, December 31, 2008	2,472,693	3,475,833	5,948,526
Accretion of discount	53,816	75,649	129,465
Carrying amount, March 31, 2009	\$ 2,526,509	\$ 3,551,482	\$ 6,077,991

Notes payable consist of two notes arising from the purchase consideration for the acquisition of Strikewell Capital and the restructuring of certain accounts payable and loans payable of the Company. The notes were issued January 1, 2006.

The principal owing under the Vendor Note and the Second Note are due for repayment on January 1, 2014 and bear interest at 2% for years one and two, 3% for years three and four, 4% for year five and 15% for years six through eight, compounded and payable semi-annually.

The interest rates on the notes payable for years one through five are considered to be below market for financial instruments with similar risk profile. Management has determined that an interest rate of 12% per annum over the term of the loan would be a closer approximation to a fair value interest rate. Accordingly, the carrying value of the promissory notes has been discounted to reflect an interest rate of 12%.

All assets of the Company have been pledged as security for loan and notes payable. The Vendor Note is due to a significant shareholder of the Company. The Second Note is due to a company owned by a significant shareholder of the Company. Both notes are measured at the carrying amount using the effective interest method.

10. CAPITAL STOCK

(a) Authorized

Unlimited number of common shares without par value
Unlimited number of Class "A" preferred shares without par value

STRIKEWELL ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the Three Months Ended March 31, 2009 and 2008

10. CAPITAL STOCK (Continued)

(b) Issued

	March 31, 2009		December 31, 2008	
	Number of Shares	Amount	Number of Shares	Amount
Balance, beginning and end of year	4,396,093	\$ 16,221,855	4,396,093	\$ 16,221,855

(c) The Class "A" preferred shares are issuable in series; each series to have rights and restrictions as determined by the board of directors. The issuance of preferred shares of any series is subject to regulatory approval. There are no preferred shares outstanding.

(d) During 2007, the Company adopted a new incentive stock option plan under which the Company may issue up to a maximum of 10% of the issued shares of the Company as stock options to acquire common shares in the capital of the Company as an incentive to officers, directors, employees and consultants. There were no stock options issued or outstanding during 2007, 2008 or 2009 to date.

STRIKEWELL ENERGY CORP.
Notes to the Interim Consolidated Financial Statements
For the Three Months Ended March 31, 2009 and 2008

12. RELATED PARTY TRANSACTIONS (Continued)

The amounts due to related parties (aside from the loan and notes payable) stated in note 9 are non-interest bearing, unsecured and due on demand.

All of the above transactions and balances, except items in note 9, are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.
